SAFE BOATING INFORMATION
1991**

FOREWORD

Published to serve as a guide to recreational boaters and operators of small commercial fishing vessels, this Directory lists a series of documents that will help to improve safety afloat, and therefore reduce the number of calls for assistance the Canadian Coast Guard receives.

Safe boating materials are listed alphabetically by title (**white pages**), with a description of their content, language status and terms, a code indicating their source and an identification number. The Sources (**yellow pages**) section provides the full address of organizations that should be contacted to get the materials. The Subject Index (**green pages**) lists the main topics of the documents, with a reference to the entry number in the white pages.

The data is based on the answers to a questionnaire that was sent to various national and provincial organizations. Not all questionnaires were thoroughly completed however, and the gaps will be filled in future editions.

To suggest additions or changes to the Directory — only corrections received before July will be considered for publication in the following edition —, or to submit comments or request further information, please write to:
